GUSTAVO LARCO

Software Engineer • Full Stack Developer • AI-Augmented Development

gustavo.larcoj@gmail.com | 737-287-6304 | St Louis, MO | LinkedIn | GitHub | Portfolio

TECHNICAL SKILLS

Languages	C#, Python 3, JavaScript ES6+, TypeScript, SQL, HTML5, CSS3, Bash
Frameworks	ASP.NET Core 9 / .NET, React.js, Next.js, Django / Django REST, FastAPI, Node.js, Bootstrap 5, Tailwind CSS
Cloud & DevOps	AWS (Lightsail, S3, RDS, Elastic Beanstalk), Microsoft Azure, Docker, CI/CD (GitHub Actions), Vercel, Nginx
Data & Databases	SQL Server, PostgreSQL, MongoDB, MySQL, Entity Framework Core 9, Power BI / DAX, Redis
AI & Automation	Claude Code (Anthropic), GitHub Copilot, OpenAI Codex / ChatGPT, Google Gemini, Cursor IDE, AI-driven code review & pair programming
Integrations	WhatsApp Cloud API, Stripe API, MailKit / SMTP, SignalR (WebSockets), ClosedXML, QR code generation, XAdES digital signatures
Tools & Methods	Git, Figma, Agile / Scrum, Microservices, REST APIs, Multi-Tenant Architecture, Domain-Driven Design, TDD

PROFESSIONAL EXPERIENCE

Simplicity Software | Software Engineer / Data Analyst **2025 – Present**

- Develop and maintain enterprise-level applications using C#, ASP.NET Core 9, and .NET serving 50+ business clients
- Build interactive Power BI dashboards with complex DAX measures, reducing report generation time by 40% for stakeholders
- Architect scalable backend services with Entity Framework Core and SQL Server, optimizing query performance by 35%
- Implement CI/CD pipelines with GitHub Actions and automated deployments to Microsoft Azure cloud infrastructure
- Leverage AI tools (Claude Code, Copilot, Gemini) for accelerated development, code review, and automated testing workflows

Freelance | Full Stack Developer & SaaS Founder **2025 – Present**

- Built and launched My-Negocio.com, a production SaaS platform with 40,000+ lines of code serving businesses in Latin America
- Designed and deployed 8+ responsive business websites for clients across salons, restaurants, and retail industries
- Delivered SEO-optimized, mobile-first web solutions with custom animations, increasing client online visibility by 60%
- Managed full project lifecycle from requirements gathering through AWS deployment, maintenance, and client training

Amazon | Warehouse Associate • Coach Ambassador **Aug 2023 – Aug 2024**

- Boosted inventory efficiency by implementing Just-In-Time (JIT) categorization methods across warehouse operations
- Selected as Amazon Coach Ambassador, training and mentoring 15+ team members on operational best practices

Marriott Aloft Hotel | Principal Customer Service **Feb 2022 – Aug 2023**

- Managed POS operations for bar and restaurant using LightSpeed OS, driving a 20% revenue increase
- Administered front desk operations including reservations, CC authorization, and guest services for 120+ room property

PROJECTS

My-Negocio.com | C#, ASP.NET Core 9, EF Core, SQL Server, AWS, WhatsApp API, Docker **2025 – Present**

Production SaaS platform managing gyms, salons, restaurants, and retail stores across Latin America

- Architected multi-tenant platform with strict data isolation (NegocioId), role-based access (Owner/Admin/Seller/Employee), and BCrypt authentication serving 4 distinct business models
- Engineered real-time financial dashboards with ApexCharts, automated WhatsApp notifications (17+ templates), and email digest system with MailKit for daily business reports
- Implemented Ecuador SRI electronic invoicing with XAdES-BES digital signatures, XML generation, QR-coded RIDE PDFs, and automatic retry background services
- Built appointment scheduling engine with FullCalendar, employee commission tracking, inventory management with audit trails, and POS system with Excel import/export (ClosedXML)
- Deployed to AWS Lightsail with GitHub Actions CI/CD, automated daily backups, blue-green deployments, and Let's Encrypt HTTPS

MyHotel | C#, ASP.NET Core, SignalR, Entity Framework Core, GitHub Actions **2026**

Real-time hotel management web application with live WebSocket updates

- Architected MVC application with real-time bidirectional communication via SignalR hubs for live booking status updates
- Designed normalized database schema with Entity Framework Core migrations and automated CI/CD pipeline with GitHub Actions

EduTools | TypeScript, Next.js, Django REST, PostgreSQL, AWS S3, Stripe **2025**

Full-stack educational platform with payment processing and cloud storage

- Developed REST API with Django and PostgreSQL, integrated AWS S3 for file storage and Stripe for subscription payments
- Built responsive frontend with Next.js and TypeScript, deployed frontend to Vercel and backend to AWS Elastic Beanstalk

PostPump | Python, React, PostgreSQL, OAuth 2.0 **2024**

Fitness tracking application with secure authentication and workout management

- Implemented 2FA and OAuth social login for secure access; designed optimized PostgreSQL schemas for high-performance queries

CarCar | Docker, FastAPI, Python, React, MongoDB **2024**

Microservices-based car dealership management system

- Built decoupled microservices for sales, inventory, and service tracking; containerized with Docker Compose for orchestration

EDUCATION

Hack Reactor | Advanced Software Engineering Immersive Program **Jul 2024**

- 800+ hours of intensive full-stack training in Python, JavaScript, React, Django, Docker, and Agile methodologies with pair programming

Universidad Técnica de Machala | Environmental Engineering **Feb 2019**

LANGUAGES

Bilingual: English & Spanish (Native) | **Proficient:** Portuguese & Italian
